

PMG SHIPYARD CO., LTD WHO WE ARE

PMG Shipyard was first established in 2004, as a privately held company with Swiss ownership & management. Strategically located by the sea on the eastern seaside of the Gulf of Thailand, close to the commercial deep seaport of Map Ta Phut and Laem Chabang, facilitating any overseas export. Specialized in the construction of mono hull and luxury catamaran yachts, both Power and Sailing, in the range of 41 to 120 feet, proudly having produced the first Luxury Solar Assisted Catamaran in the world in 2013, the Heliotrope 65. At ease in small production or single orders and with the very high standard of value-added services when it comes to customize the yacht to the clients' specific request. PMG has an important number of specialized workers and technicians, giving us the ability to handle boat building from A to Z, earning us the respect and business of many of our colleagues in Asia for whom we also manufacture certain components.

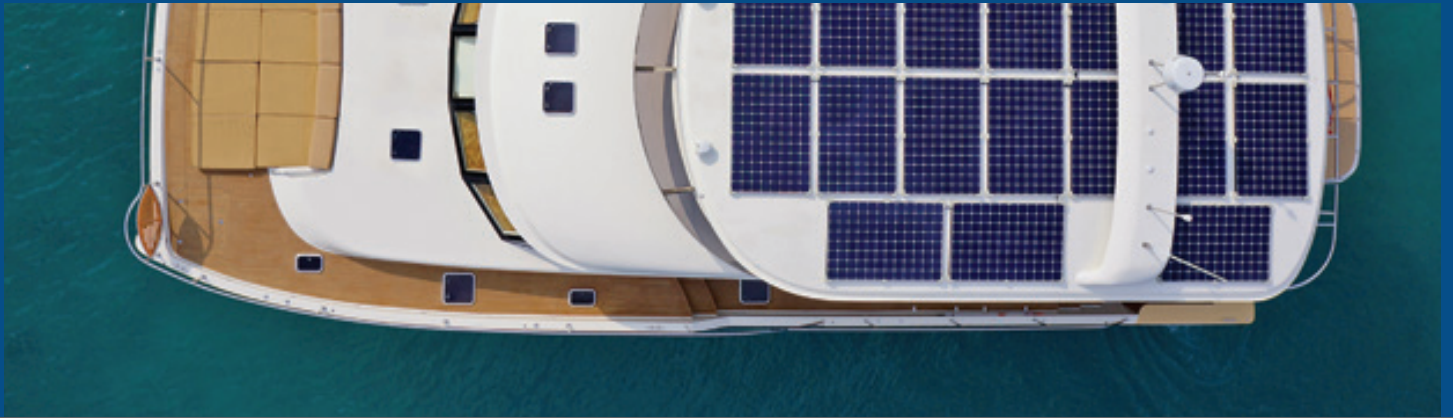

Having a strong European presence in management and key technical positions with world-renowned members of the advisory board, such as NASA astronaut Michael Lopez Alegria and Raphael Domjan who is founder of Planet Solar, allowing us to develop technically advanced, stylish, practical, economical and safe yachts. Our advisory technical board brings us on regular basis new developments and contacts with renowned universities and solar research centers for us to strengthen our expertise and remain the pioneers we are.

The shipyard has been expanding over the last years to full-fill an ever-growing demand for luxury yachts from our partners and customers, having the production and offices on a 20,800m2 facility owned by PMG Marine Complex with its direct sea access and own launching pier.

Philippe Guenat, Raphael Domjan, Michael Lopez Alegria

MEMBERS OF THE ADVISORY BOARD

Philippe M. Guénat, Swiss
Senior Partner

Passionate yachtsman, Philippe spent his childhood on the shores of Lake Geneva and soon learned about the joys of yacht racing as well as navigating on high seas. His vocation as an hotelier and his attraction to tourism have taken him as far as the Orient where he managed various establishments, presided the Hoteliers Commission of Thailand, gave lectures on Business Management and Re-Engineering at the University of Bangkok (Sasin Graduate Institute of Business Administration). As a member of a family involved in a shipyard on Lake Geneva, Philippe quite naturally decided to devote his energy and competence to PMG Shipyard. Keen on solar technology, he investigates high and low in order to become one of the pioneers of mixed energy marine transportation. Philippe is in charge of International business development and strategic partnerships.

Raphaël Domjan, Swiss
Member of the technical advisory board

PlanetSolar's Founder is a man of conviction. At the age of 40, he imagined the project and then did everything in his power to make it happen. PlanetSolar is an extraordinary technological challenge, but it is also a human adventure carrying the convictions of Raphaël Domjan and that of the team he assembled. Through PlanetSolar and the SolarPlanet foundation of which he is the president, he wants to demonstrate that we have the knowledge, the technology, the resources and enough renewable energies to change and adopt a sustainable approach. *"Tomorrow's world will reflect today's wisdom"*

Michael López-Alegria, Spanish American
Member of the technical advisory board

Michael Lopez-Alegria has over three decades of experience with the U.S. Navy and NASA in a variety of roles including Naval Aviator, Navy engineering test pilot and program manager, NASA astronaut, ISS commander, and assistant director of flight crew operations. He left NASA in 2012 and is now the President of the Commercial Spaceflight Federation in Washington, DC. Michael Lopez-Alegria holds three NASA records: longest spaceflight (215 days); most number of Extravehicular Activities (EVA) (10) and cumulative EVA time (67 hours 40 minutes).

Dean Thompson, New Zealanders
Special Project Manager

After having graduated from the New Zealand Shipyard Marine Technical college, Dean has specialized himself in the use of Vacuum Infused Carbon Fiber for racing Sailing Catamaran and other sailing competition all around the globe. His extensive knowledge of the product makes Dean to be considered as a Reference in the world of composites, requesting him to work besides New Zealand, his home country, in France, Italy, South Africa and now Thailand.

Phansak (Bee) Ruangrat, Thai
